

exist for the period June 1, 1993, through May 31, 1994:

Manufacturer/exporter	Margin (percent)
Toyota	31.58
Nissan	17.36
Toyota	14.48

(1) No shipments or sales subject to this review. Rate is from the last relevant segment of the proceeding in which the firm had shipments/sales.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. We will calculate importer-specific *ad valorem* duty-assessment rates for the merchandise based on the ratio of the total amount of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties as adjusted by the non-subject trucks (see our response to Toyota's comment 6). This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total amount of antidumping duties, which are calculated by taking the difference between foreign market value and United States price, by the total United States price value of the sales compared and adjusting the result by the average difference between United States price and customs value for all merchandise examined during the POR.) While the Department is aware that the entered value of sales during the POR is not necessarily equal to the entered value of entries during the POR, use of entered value of sales as the basis of the assessment rate permits the Department to collect a reasonable approximation of the antidumping duties which would have been determined if the Department had reviewed those sales of merchandise actually entered during the POR. The Department will issue appropriate appraisal instructions directly to the Customs Service upon completion of this review.

Furthermore, the deposit requirements made effective by the final results of the 1994-95 administrative review of this order shall continue to be effective upon publication of this notice of final results of administrative review for all shipments of forklift trucks entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(1) of the Act (*see Certain Internal-Combustion Industrial Forklift Trucks From Japan; Final Results of Antidumping Duty Administrative Review*, 62 FR 5592 (February 6, 1997)). Those deposit requirements shall

remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as the only reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d)(1). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply is a violation of the APO.

This administrative review and this notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22 (1996).

Dated: June 19, 1997.

Robert S. LaRossa,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Kin-Tek Laboratories, Inc., Patent Licenses

AGENCY: National Institute of Standards and Technology Commerce.

ACTION: Notice of prospective grant of Exclusive Patent License.

SUMMARY: This is a notice in accordance with 35 USC 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Institute of Standards and Technology ("NIST"), U.S. Department of Commerce, is contemplating the grant of a field of use exclusive license in the United States to practice the invention embodied in U.S. Patent Application Serial Number 08/686,462, titled, "Sample Storage Devices And Methods" to Kin-Tek Laboratories, Inc., having a place of business in LaMarque, Texas.

FOR FURTHER INFORMATION CONTACT: Bruce E. Mattson, National Institute of Standards and Technology, Industrial

Partnerships Program, Building 820, Room 213, Gaithersburg, MD 20899.

SUPPLEMENTARY INFORMATION: The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty days from the date of this published Notice, NIST receives written evidence and argument which establish that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

U.S. Patent Application Serial Number 08/686,462 is a permeation tube sealed internally in a commercially available automatic sampler vial which provides a simple and convenient method of preparing, using, and storing long-term samples such as retention index standards. The approach is especially suited to the handling of volatile organic compounds (VOCs). A sample can be dispensed at very low concentration, even at infinite dilution.

NIST may enter into a Cooperative Research and Development Agreement ("CRADA") to perform further research on the invention for purposes of commercialization. The CRADA may be conducted by NIST without any additional charge to any party that licenses the patent. NIST may grant the licensee an option to negotiate for royalty-free exclusive licenses to any jointly owned inventions which arise from the CRADA as well as an option to negotiate for exclusive royalty-bearing licenses for NIST employee inventions which arise from the CRADA.

The availability of the invention for licensing was published in the Federal Register, Vol. 62, No. 54 (March 20, 1997). A copy of the patent application may be obtained from NIST at the foregoing address.

Dated: June 18, 1997.

Elaine Bunten-Mines,

Director, Program Office.
